

Google Apps Account Activation Consent

Educating and equipping discerning disciples of Jesus Christ for restorative work in His kingdom.

September 2015

Dear Parent/Guardian,

Our children live in a digital age where, increasingly, they feel an urgency to find and maintain virtual identities apart from who they are as children, made in the image of God. At Cedars, we encourage reflective dialogue with students, parents, and staff around the use and role of technology. We value the freedom to create and responsibly use technology, but recognize its power to shape us as well. Online access and digital experience is balanced with the practice of “unplugging” and face-to-face conversation in our work with students.

In the interest of exploring digital stewardship with our students, all high school students – as well as grade 4-7 students, at the discretion of their classroom teacher and consent of parents – are provided Google Apps accounts. Apps accounts provide students with an email account, access to a global address list of students and staff for in-school communication, and collaborative tools for word processing and presentations. Values, guiding practices and principles in our school’s *Acceptable Use Policy* (see attached) are reviewed with students upon receiving their accounts. Google Apps accounts are managed by the school, and are not private. Account information is available to parents upon request, and may be suspended at any time by teachers, administrators, or parents if privileges are abused.

If you have any questions or concerns regarding Google Apps accounts, please contact Mr. Shane Nelson, our Technology Coordinator through the office or at shanen@cedars.bc.ca.

Please sign and return the following to your classroom teacher or the office.

I, _____, parent/guardian of _____
give consent to Cedars to activate / continue my child’s Google Apps account.
